STORAGE AND WORKPLACE SOLUTIONS

mobile shelving

- The ultimate in space saving storage, mobile shelving requires just one aisle for access. Accessibility to stored items is just a turn of a handle or the touch of a button away.
- Units are mounted on mobile bases running on floor tracks - which can be laid directly onto the existing floor surface.
- New system needs no permanent floor fixings - no damage to floor - minimum disruption to the workplace.
- Comprehensive range of decorative end panels to complement existing decor.

storage solutions

FOR THE WORKPLACE

cupboards and cabinets

- Comprehensive range of cupboards and cabinets in a wide range of sizes and configurations.
- All offer economical, robust and secure storage and feature concealed hinges, door stiffeners for added strength and security, high quality locks and adjustable shelves.
- Choice of door and body colours.
- Cabinets are available with various drawer/shelf combinations.

specialist equipment

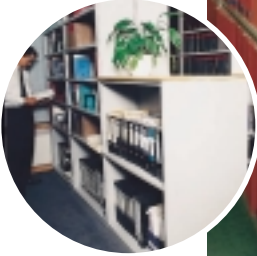

As well as standard configurations we can also offer solutions for;

- POSTROOMS
- PERSONAL PROTECTION EQUIPMENT
- GARMENT DISPENSERS
- PRODUCTION AREAS

static shelving

- Wide range of shelving solutions to cover all applications and environments, from frequently accessed files in the main office to archive and general storage.
- From simple tap together systems to bolt and clipped solutions; from single bays to two tier structures.
- Full range of accessories including lateral filing cradles, lockable doors, dividers, bin fronts, plinths and hanging rails.

x5 filing centre

- Rotary storage centre accommodating the contents of 5 four drawer filing cabinets in less than 1 sqm of floor space.
- Offers high density secure storage, ideal for flexible work spaces.
- Available with a wide range of interior accessories so that you can tailor each unit to your needs.

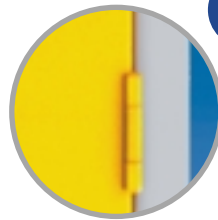

Ventilation

Vents in the front, top and bottom of the locker frame improve air circulation whilst retaining an unpierced door surface.

Locking systems

Wide range of optional fittings to choose from. Key operated dead locks with cardholder are fitted as standard, supplied with 2 keys. The locking mechanism locates behind the welded metal frame for enhanced security.

Strong hinges

Semi concealed knuckle hinges are fitted to all our lockers. These are welded to the door for strength but rivetted to the door frame to allow replacement.

Reinforced Doors

Door edges are channel folded and then welded at the corners. Security and strength are further enhanced by a steel channel reinforcer welded to the full height of the door and locating within the channel fold.

personnel storage

- The M SERIES range of metric lockers is manufactured in the UK to ISO 9001:2000, and have been tested and conform to the requirements for Standard Duty Lockers to BS4680:1996.
- Wide range of door configurations and sizes.
- All lockers are supplied as standard with deadlocks and cardholders - pistol grip locks for use with your own padlock are also available on request.
- Colours are standard RAL specifications for easier co-ordination with new or existing equipment or environments.
- Also available in imperial sizes to match existing installations.

square tube

- Joint and tube construction systems for design and build of bespoke structures or units.
- Simply cut tube to desired lengths and assemble using the one piece joint.
- Using either steel or aluminium tube and one of seven right angled joints along with a choice of accessories it is possible to create bespoke equipment for the workplace such as benches and trolleys.

ancillary systems

FOR BESPOKE SOLUTIONS

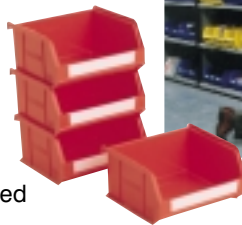

slotted angle

- Slotted Angle provides the ideal benching and frames solution.
- Simply cut and bolt together. No welding, painting or drilling required.
- Available in three sizes the angle is finished in graphite grey and stove enamelled.
- Choice of accessories to enable all types of structures to be designed and built on-site, tailored to meet individual needs.

small parts storage

- Comprehensive range of highly adaptable products specifically designed to bring order to the storage of small parts.
- Store items neatly, securely and logically for fast and easy access.
- Products include plastic drawer units, containers, louvred panels and feeder trolleys - all of which can be used independently or combined to form a complete fully integrated storage system.
