**External Dimensions**  
 x5 7 level unit  
 2150h x 850d x 1190w  
**Standard Colour:**  
 Light Grey

Today's office environment creates demands for efficiency in filing and document management. Where filing space was once dominated by conventional 4-drawer cabinets, the need for improved accessibility, space utilisation and information security has generated new storage problems

The **x5** cabinet provides the solution.

Offering a 40% saving in space and up to a 50% reduction in access times, high level security and good aesthetics the **x5** meets the demands of the modern office environment.

**x5** cabinets feature double sided shelving bays which rotate on a central axis to access either picking face. This allows the operator access to over **10.5 linear metres** of filing without moving, enabling a high filing pick rate.

When not in use the cabinet can be locked in the closed position or if required in the open position allowing access to only one of the picking faces.

## Save up to 40% floor area

The contents of 5 four drawer filing cabinets can be accommodated in one **x5** cabinet - saving up to 40% of valuable floor area.

## Increase filing capacity by up to 200%

The floor area of 5 filing cabinets can accommodate 2 **x5** cabinets - doubling the storage capacity available.
